

# SUSTAINABILITY IN ACTION

*[sales@leebrothers.co.uk](mailto:sales@leebrothers.co.uk) | 0121 567 4111*

**LEE BROTHERS'** vision is to create a safe, healthy and sustainable world. We are always looking for innovations that can help you reduce your impact on the planet. Here are some of the ways we are already integrating sustainability into our business, operations and products.

## KPI REPORTING

Our online reporting system allows you to monitor your own carbon footprint credentials and also our MI reports can be made bespoke to your organisation to help identify areas where you can improve. By analysing your sales data we can advise on products bought, site spend, frequency of ordering, look at consolidation of product and provide a critical health and safety updates/advice.

We can tailor these reports to suit the needs of your business whether that be to provide sustainability information or just help with budgets and spend reduction.

We are GOLD members of the Supply Chain School having worked with the school for a number of years. We now have our own FIR Ambassador who has worked with the school and we can now embed the fairness, inclusion and respect values into our Lee Brothers business. We are helping to work towards a sustainable future for the built environment.

## CO<sup>2</sup> REDUCTION

- Use third party carriers Fedex and Tuffnells to deliver on orders.  
- FedEx Express is aiming to increase vehicle fuel efficiency by 50% by 2025 after achieving their 2020 goal of a 30% improvement 5 years early
- New service centres are designed to maximise use of daylight and include LED lighting with PIR sensors to minimise electricity use for lighting
- We are moving to paperless operations whenever we can, including transitioning to a digital warehouse management system and conducting our performance reviews through our online portal

## WHY IS CLOSED LOOP RECYCLING IMPORTANT?

Closed loop recycling is the best way to minimise your business' environmental footprint. According to Defra statistics, UK businesses produced 41.1m tonnes of waste in 2016, up from 40m in 2014. And while recycling is becoming more common, Defra has estimated that up to 60% of the waste held in dustbins could have been recycled.

Closed-loop recycling is a process where waste – or resources as we like to call it – is collected, recycled and then used again to make the same product it came from or an alternative useful product.

### EXAMPLES OF OUR CLOSED LOOP SOLUTIONS INCLUDE:

- JSP Road Barriers
- Florprotec Floor Protection

*We also have access to a full closed loops solution for used plastic cups*

## WORKWEAR INNOVATIONS

- Regatta's Honestly Made line of workwear made using plastic bottles is just one aspect of their Honesty Project. The Project is working to promote responsible sourcing, sustainable product and materials and continued social impact and conservation programmes. When you choose an Honestly Made product, you are also supporting the work Regatta is doing through their social enterprises
- Keep it eco-friendly with our range of recycled clothing. The range from Regatta is literally made from trash
- We can offer EcoVis Hi-Vis workwear, made from 100% recycled clothing which produces 50% less greenhouse gas emissions than the existing Coolviz range
- We also launched a range of Ladies & Gents t-shirts, sweatshirts and polo shirts with two material compositions; 100% organic cotton and a mix of 60% organic cotton and 40% polyester
- Plastic bottles are collected from recycling centers, processed and spun into thread, knitted and made into wearable garments

## PPE RECYCLING

**LEE BROTHERS CAN OFFER YOU A PPE RECYCLING SERVICE,  
PARTNERING WITH A COMPANY THAT HAS A ZERO LANDFILL POLICY**

The recycling Process:

- Courier will collect unwanted clothing & PPE and brings back to a base where:
- Pockets are checked for personalisation, this means any items which identify the clothing are removed
- All logos are cut away and destroyed
- All material is recycled and end uses include fuel for industrial applications, felts and recycled fibre insulation
- Plastic materials are shredded and turned into plastic oil buoys, ice scrapers or other commercial products
- Full audits and spread sheets are issued on a monthly basis if quantity allows

### RECYCLABLE ITEMS

Clothing  
Footwear  
Ear Defenders  
Ear Plugs  
Safety Specs  
Helmets  
Respirators  
(not filters)

### WHY RECYCLE?

Improves Carbon Footprint  
Better waste Management  
Protect Brand  
Reduce Landfill costs  
Helps client reach sustainability goals

## SIGNAGE RECYCLING

- After being asked by several leading construction companies about the need for a reduction in single use plastic we set about the usual challenge of reducing areas like plastic cups, packing etc. However one area that stood out where we could make a considerable difference was around single use signage and how we dispose of it
- We have now introduced a range of 100% fully recyclable safety signage across all sizes from small entry level signs up to full 8ft x 4ft site hoarding boards. This signage doesn't use the old fashioned way of vinyl rolled onto material, we now use direct to substrate printing. This process is more environmentally friendly, as it produces less waste and results in a longer lasting sign. Additionally, it also produces more vivid print detail
- This new range of constructions signs now include a PPO5 logo and Recyclable Logo which identifies that these signs are fully recyclable and made of a material that has green credentials and environmental certificates
- The material is biodegradable at landfill however this takes between 12-15 years. To combat this issue, we can now offer a full closed loop solution for our site safety signage. This means at the end of a project, our clients can simply call us and we will arrange a collection of their used signage. Once the signs are collected these will go to a recycling centre and eventually be recycled into things like ice scrapers, cutting boards and recycling bins.

## WASTE MANAGEMENT

83% of our waste is diverted from landfill with 93% of this being recycled  
(based on 2019 figures).

We use Community Wood Recycling across most of our sites to collect old and broken pallets. They use these materials to provide training and employment opportunities through upcycling and repurposing the wood into bookcases, bird boxes and biofuel. In 2019 they provided training and work opportunities for over 850 local unemployed people and created 238 jobs.

## COMMUNITY ACTION

- We support the **Band of Builders** who are a registered charity that aim to help members of the construction industry when times get tough, whether that's through hands-on projects, advice and support or just to lend an ear.
- We have also recently engaged with **ISE** who are a **social enterprise** development organisation providing opportunities for the **social** and community sector in **Birmingham** and beyond. We believe social enterprise has the potential to change the way we do business for the better.
- We are a **Partner Member** of the **Considerate Constructors Scheme**.
- In 2019 Bunzl Safety Supplies raised £6752.51 for Mates in Mind as the chosen charity and they are continuing to support them throughout 2020.
- Every Lee Brothers employee is advocated to take one day's paid leave to volunteer for a cause of their choice.
- All of Bunzl Plc fundraise & donate stock throughout the year.

## PPE RECYCLING

### How To ...

1

Contact Lee Brothers to order bag (product code: 496169) using the contact details opposite and list the details needed.

2

Lee Brothers contact recycling company & request a woven bag will be sent to site via Royal Mail tracked delivery within 3 working days.

3

Once the bag is full, site to contact recycling company using details displayed on the bag.

# ZERO TO LANDFILL POLICY

### Items that can be Recycled ...

- Clothing
- Footwear
- Ear Defenders
- Ear Plugs
- Safety Specs
- Helmets
- Respirators (not filters)

### Contact information

when requesting a recycling bag please contact:

[SALES@LEEBROTHERS.CO.UK](mailto:SALES@LEEBROTHERS.CO.UK)

### Details Needed

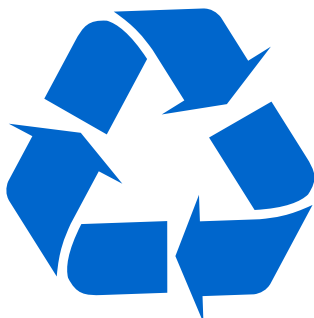

- Contact name
- Site / office full address including postcode
- Telephone number
- Contract number
- Site opening times and any special instructions
- Order number

### Costs

**£23** for England, Wales & Southern/Central Scotland only. There is an additional charge for any remote areas in Scotland and any offshore locations.

### Why?

- Improves carbon footprint
- Better waste management
- Protect brand
- Reduce landfill cost as no longer throwing away
- Help reach sustainability goals

### The Recycling Process

Courier picks up unwanted clothing and PPE and brings it back to the base where:

- Pockets are checked for personalisation. This means any items which identify the clothing are removed.
- All logos are cut out and destroyed
- All material is recycled and end uses include fuel for industrial applications, felts and recycled fibre insulation
- Full audits/spreadsheets are issued on a monthly basis to show end uses

## WHAT HAPPENS TO YOUR RECYCLED PPE?

### *SRF (Solid Recovered Fuel)*

This is the lower grade of waste. It includes any PU backed nylons, PTFE's, plastic safety helmets, coat hangers and leather. This would include items like waterproof coats, trouser belts, safety boots, respirators, baseball caps etc. These items have too much contamination for the higher WPF grade below and after shredding are shipped to our SRF partner where they are compressed into fuel pellets and burned in the energy sector ie energy from waste.

### *WPF (Waste Processed Fibre)*

This higher grade would include items like work trousers, polo shirts, formal shirts, jackets, blazers, pullovers etc. The best items for this grade need to include a natural fibre element so things like Polycotton polo shirts and work pants. The garments need to be clean (ish) and without too much contamination (ie not too many zips or buttons). Again its shredded in house to 15mm.

### *Fleece Jackets & Polyester Clothing*

The process for these is the same as above but due to the Polyester fibre they can not be processed with the WPF. This is because the WPF process creates a great deal of heat and polyester melts rather than some WPF applications.

All of the waste consigned under the agreement should be dry and free from contaminants, if there are any items in the waste that should not be there the warehouse will complete a non-compliance sheet and there may be additional charges payable depending on the level of contamination or amount of foreign material.

\*The PPE recycling service is for Controlled Waste only and specifically excludes hazardous waste, this includes items (heavily) contaminated with fluids, oils or chemicals, glass and sharps, aerosols and respirator filters. You will need to make Hazardous waste arrangements for these items. The respirators themselves are OK but filters are not as they are quite clearly hazardous waste under the Waste Regulations and will require special treatment. There are very specific rules for the disposal of hazardous waste and the waste definitions can be found at: <https://www.gov.uk/guidance/waste-legislation-and-regulations>

# THE UK'S NO.1 ECO-FRIENDLY CLEANING REFILL BRAND

# OCEAN SAVER<sup>®</sup>

Power-Cleaning EcoDrops

## 500 BILLION

plastic bottles are used every year – meaning, there are 66 times as many bottles as there are humans on the planet.

## 50%

of all plastic produced (380 million tons per year) is for single-use purposes – used for just minutes and then thrown away.

## 10 MILLION

tons of plastic are dumped in our oceans annually. That's equal to more than a garbage truck load every minute.

## 450 YEARS

is how long a plastic bottle can last in the marine environment.

# OCEAN SAVER®

**LEE BROTHERS**

JOIN OUR MISSION TO SAVE 1 MILLION PLASTIC BOTTLES FROM REACHING THE OCEAN

## PLANT BASED AND PLASTIC FREE CLEANING

OceanSaver® concentrated EcoDrops™ make it possible to **REFILL AND REUSE** your existing cleaning spray bottles.

We are here to help you remove single-use plastic from your cleaning routine, saving our oceans for future generations

Our EcoDrops™ are made from biodegradable PVOH, a water soluble film that fully dissolves allowing the active ingredients to mix in water and transform into liquid cleaner.

BECOME AN OCEAN SAVER in 4 easy steps

1. **PURCHASE A BOTTLE FOR LIFE. JUST ADD WATER**

2. **SHAKE TO MIX**

3. **CLEAN YOUR WORKSPACE AND SAVE THE OCEANS**

4. **REFILL WITH A JANITORIAL PACK**

**LEE BROTHERS**

**We re-engineer waste paint into a premium quality paint for the trade.**

**Paint** <sup>360</sup>

Every year in the UK it is estimated that 55 million litres of waste paint is sent to landfill or incineration

## Best Practice for Waste Paint

Paint is received nationally at our dedicated waste paint recycling centre

Sorted by paint type and colour

Every can is opened, stirred and checked for quality before the re-engineering process may begin

Supplied in recycled paint pots

Waste paint is re-engineered to **compete** with leading brands on **quality** and **price**.

Up to 95% recycled content

1 litre of our paint saves enough embedded carbon to drive a transit van 5 miles carbon free

Creating job opportunities for those with **barriers to employment**

Social Enterprise lowering carbon while increasing closed loop recycling

# Polyflex® Eco

An Environmentally Conscious  
Range Of Gloves

# Polyflex® Eco

## An Environmentally Conscious Range Of Gloves

### The Technology Behind The Glove

The **first** reusable glove in the market **made from recycled plastic bottles**. An innovation that turns **waste** plastic into gloves.

Plastic bottles start their second life cycle as a glove liner material. And the result is:

1x500ml plastic bottle  
=  
1 x PolyFlex® Eco pair

The gloves are certified by the Global Recycled Standard, which validates recycled fibre content claims and composition.

### The Range

Currently available in Latex or Nitrile coated options. Both gloves offer PPE CAT II protection.

For further information:

The PolyFlex® Eco range offer a greener and more sustainable way to protect your hands that will not compromise on quality and performance.

### FROM BOTTLES TO GLOVES

The Future Of The Planet Is Now In Your Hands

### KEY FACTS

- Conventional gloves are made from virgin polyester which is derived from oil.
- ✓ By replacing virgin polyester with recycled yarn, PolyFlex® Eco uses 8ml of oil less per pair.
- ✓ The manufacturing process also requires 3 times less water usage.
- The process of refining oil for polyester production releases carbon dioxide.
- ✓ PolyFlex® Eco uses recycled PET which produces 14g CO<sub>2</sub> less per pair.
- ✓ PolyFlex® Eco comes in a plastic free packaging format to ensure that any residual packaging made of paper and card can easily be recycled.

## Polyflex® Eco L

PEL

Seamless knitted liner made in part from recycled plastics, with a sandy latex coating

### Sectors:

- Automotive • Construction & Utility
- Engineering and Manufacturing
- Warehousing, Transport and Logistics
- Waste Management and Local authority

### Packing

10 pairs per paper band  
60 pairs per case

### Features

**Environmentally Conscious:** Each pair of gloves contains 10 grams of recycled plastic bottles (PET), cutting down our reliance on virgin materials like oil based polyester

**Unmatched comfort:** Polyflex® Eco L sets a new standard for comfort and dexterity in the industry

**Grip:** The sandy latex coating has been specifically developed to resist abrasion, whilst maintaining superior grip and dexterity

**Widest range of sizing:** Polyflex® Eco L is available from size 5 through to size 12 to ensure wearers of all sizes are protected

**Packaged plastic free:** Polyflex® Eco L is packed without the use of plastic, reducing the overall weight of packaging

**Knit Wrist:** Elasticated knit wrist ensures a secure fit and keeps hands free from dust and debris

Reusable Gloves

## Polyflex® Eco N

PEN

Seamless knitted liner made in part from recycled plastics, with a foamed nitrile coating

### Sectors:

- Automotive • Construction & Utility
- Engineering and Manufacturing
- Warehousing, Transport and Logistics
- Waste Management and Local authority

### Packing

10 pairs per paper band  
60 pairs per case

### Features

**Environmentally Consious:** Each pair of gloves contains 10 grams of recycled plastic bottles (PET), cutting down our reliance on virgin materials like oil based polyester

**Unmatched comfort:** Polyflex® Eco N sets a new standard for comfort and dexterity in the industry

**Durable:** Achieves maximum score for abrasion as defined in EN388 2016 helping to reduce waste created by premature discarding from early wear and tear

**Widest range of sizing:** Polyflex® Eco N is available from size 5 through to size 12 to ensure wearers of all sizes are protected

**Packaged plastic free:** Polyflex® Eco N is packed without the use of plastic, reducing the overall weight of packaging

**Knit Wrist:** Elasticated knit wrist ensures a secure fit and keeps hands free from dust and debris

# CHOOSE SUSTAINABLE STYLE

## Honestly Made

As a family run business built on strong values, we feel honesty, courtesy and respect are essential in every decision we make. We are not perfect yet, but striving to be transparent in everything we do, every step of the way.

Being a more sustainable brand

Conscientious / ethical buying

Reducing Carbon footprint

Caring about our teams worldwide

Looking after the earth

## Honest Sourcing

Through our dedicated factories and supply chain we do everything we can to reduce our impact on the earth.

Sustainable fabrics

Less Water

Less energy

Less pollution

## Honest Logistics

We continually review methods and ways to consolidate our shipments.

Fly less

Less road miles

Clever consolidation for shipping

Electric fleet cars

## Honest Products

We focus on creating sustainable products, thoughtfully engineered for the great outdoors and your line of work.

**HONESTLY  
MADE**

100% recycled fabric

Made from plastic bottles

Insulation made from plastic bottles

PFC free

Recycled or partially recycled packaging

## Honest People

Across our workforce, we actively implement ways to reduce our impact on the environment.

Use digital comms more

Print less

Print recycled

Switch off (computers/ lights etc)

Recycle more (within our offices and stores)

## Honest Customers

What does working with Regatta Honestly Made mean to your business?

Allows people to lead more plastic free lives

Offers businesses sustainable uniform solutions

Gives people and businesses more sustainable options

TRA154

**SOFTSHELL XPT**

Water repellent and wind resistant to keep you warm and comfortable during high energy activities. This break through technology enables better breathability whilst the lightweight qualities give greater ease of movement.

**EXTOL STRETCH**

Regatta's pinnacle stretch fabric technology is ideal for high energy outdoor activities, with a quick drying finish to minimise rain impact and provide protection from windchill.

**SYMMETRY**

Comfortable and practical to wear, perfect for the outdoors with an anti-pill finish making it durable and long lasting. Quick drying, easy to care for and super soft to provide extra comfort.

\*Made from 100% recycled fabric.

**WARMLOFT**

Premium synthetic down touch insulating technology. A highly compressible, soft-touch warmth without the bulk. Water repellent and quick drying to help reduce odour.

**DURAZONE**

Hardwearing and reliable fabric created to withstand the everyday wear and tear of the workplace. With a durable and abrasion resistant finish and a water repellent treatment, Durazone will perform in the toughest conditions.

**SOFTSHELL**

Water repellent and wind resistant to keep you warm and comfortable during high energy activities.

\*Made from 100% recycled fabric.

\*\* Made from sustainable fabrics.

**COOLWEAVE**

Quick dry, and highly breathable performance fabric. Practical to wear, and perfect for the outdoors. Easy to care for and a super soft, comfortable wear.

\*Made from 100% recycled fabric.

**LAYERLITE FLEECE**

Regatta Layerlite fleece provides an alternative approach to standard layering systems. Lightweight warmth and comfort without the bulk. Quick drying and easy to care for.

**Thermo-guard**

Made up of synthetic fibres which trap the air keeping you warm in cold conditions, soft and light with the warmth coming from the high loft insulation, quick drying and easy to care for.

**SOFTSHELL STRETCH**

Durable Water Repellent outer fabric helps to keep you drier for longer, quick drying for protection from wind chill and fleece backed for comfort and warmth.

**ISOFLEX****ISOFLEX**

Achieve ultimate stretch performance with new generation polyester yarns. The innovative spiral structure provides durability, stretch and soft touch comfort. With the benefit of reduced chemical processing the fibres are also much more environmentally friendly.

Outer jackets or midlayers that have zip-together compatibility with identified interactive Regatta products.

**PFC FREE**

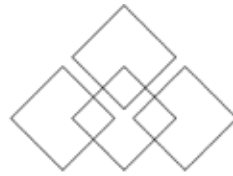

Products made without using any PFCs. We are committed to finding alternatives to using PFC chemicals and are working towards a reduction by 2020.

**YOUR PERFORMANCE GUARANTEE**

We will, without reservation, replace this product entirely free of charge if returned due to a manufacturing or fabric fault, within a period of 2 years for Hydrafort 5000 and 3 years for Isotex and Isolite from the date of purchase.

For more information and to register your guarantee, please enter your details on our website at:  
[www.regattaprofessional.com](http://www.regattaprofessional.com)

## THE HONESTY PROJECT

As a family business built on a strongly believed set of values, we feel that honesty, courtesy and respect are essential to all the decisions we make. We focus on creating fantastic product, thoughtfully engineered for the great outdoors and in doing so will hopefully enhance the lives of those touched by our business. We are not perfect yet, but we are striving to be committed to honesty and transparency in everything we do, every step of the way.

### RESPONSIBLE SOURCING

As an Achiever level member of the ETI, we ensure workers in our partner factories are treated fairly, with good working conditions. We have inspected over 116 factories in 7 countries to ensure that 40,000 workers are covered by the ETI Base Code.

### FASHION FOR GLOBAL CLIMATE ACTION

We are proud to have joined the UNFCCC's Fashion for Global Climate Action initiative as a signatory to the Fashion Industry Charter for Climate Action. We have committed to reduce our carbon footprint across our supply chain by selecting climate friendly and sustainable materials.

### SUSTAINABLE PRODUCT

Our recycled fabrics are GRS certified and we are committed to increasing our use of GRS certified fabrics

We use fluorocarbon free (PFC free) water repellent finishes.

This is a globally recognised independent system that verifies responsible and sustainable manufacturing of textiles.

### Responsibly Sourced Down

100% of our Down products are ethically sourced.

We are at the forefront of research in finding a solution to reducing the fibre loss during production.

### SOCIAL IMPACT PROGRAMMES

We manage and fund the Regatta Group Savar School in our garment factory area in Dhaka, Bangladesh for students between the age of 4-14, some with learning and physical disabilities. We have impacted over 3000 families to date.

We provide education on health, hygiene, nutrition and finance to female workers in Bangladesh. To date, we have reached over 10,000 workers.

We work with Newlife the Charity for Disabled Children a leader with over 25 years of experience in the field of sustainability and recycling. Profits from the sale of our donated items help to provide essential equipment for disabled children, medical research into birth defects and campaigning for change to support disabled children.

### OUR ENVIRONMENT

As a member of EOCA we help support their valuable conservation projects all over the world.

**ECO-FRIENDLY****activ  
step****Rock Fall®**  
INDUSTRY DEFINING SAFETY FOOTWEAR

Activ-Step® eco-friendly socks are abrasion resistant, naturally antibacterial and highly comfortable.

Packed with features they are manufactured using more than 50% bamboo and have wear resistance higher than normal industry standards.

The packaging has been selected with careful consideration, featuring recycled and recyclable kraft card and soya inks which make it far easier for our recycling centres to process.

**SECURING WELT TOP**

Keeps sock in place

**RIBBED CALF SUPPORT**

Secures sock around calf

**BAMBOO+ ODOUR CONTROL**

Control the growth of odour causing bacteria-stay fresh and clean

**FULL CUSHIONED FOOT**

Great comfort wearing for long working hours

**REINFORCED HEEL & TOE**

Provides durability in high impact areas

**COMFORT TOE SEAM**

Helps prevent irritation

**334235 - Pack of 2**

Activ-Step® technical performance laces are waterproof, snap resistant and knot slippage resistant.

Packed with features they are manufactured using recycled plastic bottle polyester that has wear resistance higher than normal industry standards.

The packaging has been selected with careful consideration, featuring recycled and recyclable kraft card and soya inks which make it far easier for our recycling centres to process.

**IMPORTANT INFORMATION**

Waterproof, snap resistant and knot slippage resistant

Manufactured using recycled plastic bottle polyester

Lab tested knot slippage tests which how much force is required to loosen the knot

Non-wicking means water beads off instead of soaking in

**334236 - 160cm**

# WHAT HAPPENS TO YOUR SIGNS WHEN THE PROJECT ENDS?

## HANDS UP WHO WANTS TO SAVE THE PLANET?

### TRADITIONAL METHODS OF DISPOSING OF SIGNS

Traditionally at the end of the project signs will be collected and disposed of.

More often than not the method of disposal will be in a skip along with other mixed waste.

This will then be sent to landfill and could take hundreds of years to degrade, adding to the mess we've already made.

### Lee Brothers CLOSED LOOP SYSTEM OF RECYCLING

Our construction signs are 100% recyclable

The signs can be sent to a Recycle Centre to be processed for re-purposing.

The recycled plastic from your signs will then be made into ice scrapers, buckets, bins etc. and can be recycled again and again

**“stop sending construction signs to landfill”**

## Professional cleaning products for the hospitality industry

Cleanline Eco products are produced and bottled in the UK by manufacturers accredited with environmental standard ISO 14001.

## WHAT IS CLEANLINE ECO?

**Cleanline Eco** is a range of professional cleaning products designed to effectively tackle routine and periodic cleaning tasks in a catering and hospitality operation with a reduced impact on the environment. All products in the Cleanline Eco range have been developed to our Eco Star standard for sustainability. This means that each product in the range must meet some or all of the sustainability criteria set in the Eco Star standard.

The Cleanline Eco range includes three product formats: concentrated products that are diluted by the customer at point of use, ready-to-use products that can be applied directly from the bottle and biological-based products that break soiling down in a biological process. Each product format has specific sustainability attributes, and customers may choose to use one format or a mixture of all three, depending on their specific cleaning requirements.

## CLEANLINE ECO DELIVERS PROFESSIONAL RESULTS

Supplied with guidelines for safe handling and correct usage, Cleanline Eco professional, easy to use products facilitate a clean and hygienic environment in kitchens, washrooms, housekeeping and janitorial areas.

Containing more chemical and less water, Cleanline Eco concentrated products are lighter and take up less space when in transit compared to ready-to-use cleaning products, potentially reducing CO2 emissions and improving air quality.

5 litre containers and 1 litre angle-neck bottles in the Cleanline Eco range are manufactured with a minimum of 40% recycled HDPE plastic; 750ml ready-to-use trigger bottles are manufactured with a minimum of 30% recycled PET. When finished, rinsed and with labels removed, empty containers and bottles can be placed in mixed recycling to be identified and segregated at a MRF (Material Recovery Facility).

## Daily Toilet Cleaner

Cleanline® Eco Daily Toilet Cleaner is a mild cleaner for the daily maintenance of toilets and urinals.

- Daily maintenance cleaning of toilets and urinals.
- Viscous formula uniformly coats and clings to surfaces for more thorough clean and reduces limescale build-up where germs and bacteria breed.
- Safe to use on a variety of hard surfaces including porcelain, stainless steel, chrome, ceramic & quarry tiles.
- Incorporates a restrictive flow cap nozzle helping prevent over application and wastage.
- Simple and easy to apply with an angled neck 1 litre bottle helping reach right under the toilet rim.
- Effective in soft and medium water conditions and leaves a fresh citrus fragrance.

#### RECOMMENDED DILUTION:

Use as supplied from the directional bottle.

#### ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.

##### INSTRUCTIONS FOR USE

**TOILET BOWLS:** For best results flush the toilet and force water around "S" bend with toilet brush. Remove cap and aim directional bottle under the rim at the water outlets and around the toilet bowl above the water level. Leave for 10-15 minutes and agitate with a brush if necessary. Flush with clean water and rinse brush after use.

**URINALS:** Apply evenly across the surface of the urinal. Leave to act for 5 minutes before scrubbing stains with a brush. Allow to flush automatically. Rinse brush after use.

**PRO TIP: FOR BEST RESULTS IN TOILET BOWLS, LOWER THE WATER LEVEL USING A PLUNGER/TOILET BRUSH FIRST, TO ENSURE THE PRODUCT ACTS DIRECTLY ON STAINS AND LIMESCALE AT THE WATER LINE.**

**IMPORTANT: DO NOT USE IN CONJUNCTION WITH BLEACH BASED PRODUCTS, THIS WILL PRODUCE TOXIC CHLORINE GAS.**

#### CODE AND CASE SIZE:

**CL3031** - 1 Litre (supplied in case of 6)

#### PRODUCT INFORMATION:

UFI: HH00-W0TQ-D003-CMM5

Appearance: Light green liquid

Odour: Citrus

Oxidising: Non-oxidising (by EC criteria)

Solubility: Fully miscible with water

Viscosity: Viscous

Flash point °C: >65

pH as supplied: 2 - 3

Packaging: 1L Bottle made in the UK from 40% recycled polymer.

#### QUALITY ASSURANCE:

This product is manufactured in the UK for Bunzl UK & Ireland and produced under ISO 9001 Quality Management System & ISO 14001 Environmental Management Systems. This product has not been tested on animals.

#### ENVIRONMENTAL:

All surfactants used in Cleanline products comply with the current European regulations concerning biodegradability & protection of the environment.

#### SAFE HANDLING:

Always wear the correct Personal Protective Equipment (PPE) when handling, dispensing or using chemicals. All PPE should comply with appropriate standards and be readily available for use.

In case of an accident please refer to the product Safety Data Sheet (SDS) for immediate first aid measures and helpline telephone number for a medical emergency.

#### SAFE STORAGE:

Store sealed in original container in a cool, well ventilated area away from direct sunlight and extremes of temperature.

## Lemon Floor Gel

Cleanline® Eco Lemon Floor Gel is a concentrated multi-surface cleaner that contains natural oils to help gently clean without stripping polished floors.

- pH neutral formula safe for use on most floor types including linoleum, vinyl, woodblock and terrazzo tile floors.
- The natural oils and non-abrasive formula help to gently clean without stripping polished floors.
- Floors can be buffed to a high sheen.
- Dissolves scuff and heel marks from hard floors whilst bringing back to a shine.
- Low foaming, suitable for use with floor scrubbing machines.
- Pine-oil free formula.
- Not classified as hazardous.
- Leaves fresh citrus clean fragrance during and after use.

**RECOMMENDED DILUTION:** Dilute accordingly to task and soiling level.

Light duty floor cleaning	Dilute up to 1 in 100 parts	Bucket: Add 50ml per 5 litres of water.
General floor cleaning	Dilute up to 1 in 50 parts	Bucket: Add 100ml per 5 litres of water.
Heavy duty surface soiling:	Dilute 1 in 10 parts	Bucket: Add 100ml per 1 litre of water.

**ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.**

### INSTRUCTIONS FOR USE

**General floor cleaning:** Hard floors should be swept and free from any loose debris. Apply the solution with a mop, walking backwards mopping in an "S" shape pattern. Allow contact time but do not allow the solution to dry. If required, agitate the surface using a deck scrub brush in all directions. Remove the soiled solution then rinse the surface with clean water. Allow to air dry.

### CODE AND CASE SIZE:

**CL2018** - 5 Litre (supplied in case of 4)

### PRODUCT INFORMATION:

ISSUE DATE: 01/04/2021

## Floor Maintainer

Cleanline® Eco Floor Maintainer is a concentrated cleaner and maintainer for spray buffing, mopping and scrubber drying of all water-resistant hard floors.

- Effective at removing scuff marks and extends the life of a polished floor.
- Repairs and re-coats surfaces leaving a protective slip-resistant finish.
- pH neutral formula is safe for use on all hard floor surfaces including marble, stone and wood.
- Solvent-free floor maintainer and contains no phosphates.
- Leaves a fresh cologne fragrance.
- Ideal for use in scrubber driers machines. Low foaming for fast solution pick-up and optimal recovery tank use.
- Suitable for floors previously treated with emulsion floor polish.
- Use with **T15** Floor cleaner/maintainer labelled trigger bottle for spray cleaning/burnishing applications.

**RECOMMENDED DILUTION:** Dilute according to task and soiling level.

General hard floor/ machine cleaning:	Dilute up to 1 in 20 parts	Add 50ml per 1 litre of warm water.
Spray cleaning/ burnishing:	Dilute up to 1 in 10 parts	<b>T15</b> Trigger spray bottle: Add 100ml to 600ml of water.

**ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.**

### INSTRUCTIONS FOR USE

**Damp Mopping:** Make sure hard floors are swept and free from loose debris. Apply the solution with a mop and walking backwards mop in an "S" shape pattern. Allow contact time but do not allow the solution to dry. Remove the soiled solution and rinse the surface with clean water. Allow to air dry. Burnish to a shine with a nylon polishing pad.

**Spray Cleaning/Burnishing:** Always clean the surface with a mild detergent prior to application of floor maintainer. Trigger bottle spray solution directly to the floor surface slightly ahead of the rotary floor machine. Immediately burnish lightly until dry.

Do not attempt to spray buff very dirty floors, these should be mopped or scrubbed with a mild detergent prior to application

**IMPORTANT: DO NOT USE ON UNSEALED WOOD OR CORK FLOORS. DO NOT OVER APPLY SOLUTION TO SURFACE. DO NOT ATTEMPT TO SPRAY BUFF DIRTY FLOORS.**

### CODE AND CASE SIZE:

**CL2017** - 5 Litre (supplied in case of 4)

**CL9015** - Empty **T15** labelled trigger spray bottle

## Neutral Hard Surface Cleaner Concentrate

Cleanline® Eco Neutral Hard Surface Cleaner Concentrate is a multi-purpose cleaner with a fresh lemon zest fragrance, suitable for use on washable hard surfaces including floors, walls, doors and general equipment.

- Highly economical in use general-purpose hard surface cleaner.
- Will quickly remove stubborn dirt and heavy grease from floors, walls and other hard washable surfaces.
- Gentle neutral pH formula, safe for use on range of sensitive surfaces including plastic, marble, granite, vinyl and chrome surfaces.
- Suitable for use on 'Altro' quarry tiled and terrazzo hard floors.
- Can be used with a deck scrubber machine for deeper cleaning of grouting and safety flooring.
- Safe for use on polish and shine glazed ceramic tiles, stainless steel and glass.
- May be used at different concentrations to fulfil a range of cleaning tasks. Use with **T6** Hard Surface Cleaner labelled trigger spray bottle.

### RECOMMENDED DILUTION: Dilute according to task and soiling level.

General cleaning: (walls, floors & equipment)	Dilute up to 1 in 50 parts	Bucket: Add 10ml per 1 litre of cold water.
		<b>T6</b> Trigger bottle: Add 15ml to 600ml of water.
Heavy duty cleaning: (heavy impacted oil & grease)	Dilute up to 1 in 25 parts	Add 50ml/100ml per 1 litre of cold water.
		<b>T6</b> Trigger bottle: Add 25ml/50ml to 600ml of water.
Stone floors:	1 in 25 parts	Add 40ml per 1 litre of cold water.

### ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.

#### INSTRUCTIONS FOR USE

**Floor cleaning:** Make sure hard floors are swept and free from loose debris. Apply the solution with a mop, walking backwards mopping in an "S" shape pattern. Allow contact time but do not allow the solution to dry. If required, agitate the surface using a deck scrub brush in all directions. Use a grout brush to scrub between any grout lines and edging. Remove the soiled solution then rinse the surface with clean water. Allow to air dry.

**Hard surface cleaning:** Clean and remove all loose dirt soiling from surface. Apply liberally direct onto surface or onto or with a clean cloth and wipe. On tough soiling allow contact time and agitate with a cloth/brush. Wipe the area clean with a clean cloth/paper towel. Allow to air dry.

## Glass & Stainless Steel Cleaner

Cleanline® Eco Glass & Stainless Steel Cleaner is a non-abrasive cleaner for glass, mirrors, laminates, ceramics and stainless steel surfaces leaving a clean and smear-free surface.

- Ammonia free, non-abrasive ready-to-use multi-surface cleaner.
- Easy spray-on, wipe-off action and evaporates from surface to leave a clean, smear-free, shiny surface.
- Suitable for use on water-resistant hard surfaces, including windows, mirrors, glazed ceramics as well as plastic surfaces.
- Excellent removal of fingermarks as well the spot treatment of other slightly adherent soils.
- Highly effective and safe for use on high gloss laminates, polished granite and stainless steel surfaces.
- Perfume free and non-tainting formulation.

#### RECOMMENDED DILUTION:

Use as supplied from the trigger spray bottle.

#### ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.

#### INSTRUCTIONS FOR USE:

**Glass cleaning:** Remove any dust and light soiling from surface. Apply sparingly onto surface/ cloth and wipe immediately with a clean, dry, lint free cloth. For small areas, apply directly on to the cloth then wipe on the surface to be cleaned. Excessive product usage will cause smearing. Buff with a dry cloth/paper towel for extra shine.

**For heavily soiled surfaces repeat application.**

**PRO TIP: ALWAYS MAKE SURE YOUR CLOTH OR DISPOSABLE PAPER TOWEL IS CLEAN AND DRY TO AVOID SMEARING.**

**TEST MATERIAL COMPATIBILITY IN A SMALL, INCONSPICUOUS PLACE BEFORE USE. EXTRA CARE SHOULD BE TAKEN WITH POLYCARBONATE AND PERSPEX SURFACES.**

## Washroom Cleaner

Cleanline® Eco Washroom Cleaner is a powerful multi-surface daily bathroom cleaner disinfectant, safe for use on most bathroom fixtures, fittings and washable hard surfaces.

- Ready-to-use bathroom cleaner disinfectant.
- Rapidly removes scum residues and general washroom soiling.
- Safe for use on most bathroom fixtures, fittings and hard surfaces.
- Leaves a distinctive, pleasant apple fragrance.
- Effective against most common forms of bacteria.
- Independently tested to European Standard Test Method BS EN 1276:2019 with only 30 seconds contact time.

#### RECOMMENDED DILUTION:

To clean and sanitise washroom surfaces, use as supplied to meet the requirements of BS EN 1276:2009 with only 30 seconds contact time for complete bactericidal action.

General washroom cleaning:	Dilute up to 1 in25	Bucket: Add 40ml per 1 litre of water.
----------------------------	---------------------	--

#### ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.

##### INSTRUCTIONS FOR USE:

##### Two stage cleaning for hard surface (best practice):

Stage 1 Clean: Remove any loose/visible soiling from surface. Apply directly to surface or with a damp cloth/sponge and wipe away dirt and limescale from surface.

Stage 2 Sanitise: Re-apply to surface allow recommended contact time (30 seconds for protocol EN 1276). Rinse cloth in fresh warm water, wring out and wipe surface clean. Buff with a clean cloth/paper towel for extra shine or allow to air dry.

#### MICROBIOLOGICAL ACTIVITY

Tested independently in accordance with;

##### BS EN 1276:2009

Tested under dirty conditions, with a minimum contact time of 30 seconds.

Bacterial action against *Pseudomonas aeruginosa* ATCC 15442, *Enterococcus hirae* ATCC 10541, *Escherichia coli* ATCC 10536 and *MRSA* NCTC 12493

J000171-3

A summary of the tests is available on request.

## Mild Washing Up Liquid

Cleanline® Eco Mild Washing Up Liquid is a concentrated general-purpose neutral detergent for manual dishwashing and cleaning of kitchen equipment and other pH sensitive hard surfaces.

- Highly versatile and economical pH neutral detergent.
- Cuts through grease, fat and oil on kitchen equipment, glassware, crockery, cutlery, pots, pans and ovenware.
- Safe to use on all pH sensitive hard surfaces and floors including limestone and marble.
- Suitable for cleaning all types of glassware, cutlery, crockery, equipment and hard surfaces.
- Contains no phosphates or added perfume.

### RECOMMENDED DILUTION: Dilute according to task and soiling level.

Light/medium duty soiling, manual washing up:	Dilute up to 1 in 400 parts	Sink: Add 25ml to 50ml per 10 litres of warm water.
Medium/heavy soiling manual washing up:	Dilute up to 1 in 200 parts	Sink: Add 50ml to 100ml per 10 litres of warm water.
For general cleaning floors, walls, tiles and vehicle hard surfaces:	Dilute up to 1 in 100 parts	Bucket: Add 50ml per 5 litres of warm water. <b>T1</b> Trigger spray bottle: Add 15ml to 600ml of water.

### ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.

#### INSTRUCTIONS FOR USE

**Manual hand washing up:** Dispense product into sink under hot running water. Scrape and dispose of loose food debris from items before being washed. Soak items to be cleaned and agitate surfaces with cloth, brush or scouring pad. Rinse thoroughly and allow to air dry.

**General hard surface cleaning:** Remove any loose soiling from hard surfaces before cleaning. Apply product to surface with a mop/cloth/brush and allow a few seconds contact time. Agitate/wipe surface as required then rinse with clean water. Allow to air dry.

#### CODE AND CASE SIZE:

For general cleaning floors, walls, tiles and vehicle hard surfaces:	Dilute up to 1 in 100 parts	Bucket: Add 50ml per 5 litres of warm water. <b>T1</b> Trigger spray bottle: Add 15ml to 600ml of water.

### ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.

#### INSTRUCTIONS FOR USE

**Manual hand washing up:** Dispense product into sink under hot running water. Scrape and dispose of loose food debris from items before being washed. Soak items to be cleaned and agitate surfaces with cloth, brush or scouring pad. Rinse thoroughly and allow to air dry.

**General hard surface cleaning:** Remove any loose soiling from hard surfaces before cleaning. Apply product to surface with a mop/cloth/brush and allow a few seconds contact time. Agitate/wipe surface as required then rinse with clean water. Allow to air dry.

#### CODE AND CASE SIZE:

**CL1068** - 1 Litre (supplied in case of 6)

**CL1067** - 5 Litre (supplied in case of 4)

**CL9001** - Empty **T1** labelled trigger spray bottle

#### PRODUCT INFORMATION:

UFI: F5WC-80NA-K004-TGU6

Appearance: Green Liquid

Odour: Odourless

Viscosity: Viscous

pH as supplied: 6 - 10

Packaging: 5L Bottle made from 40% recycled polymer

#### QUALITY ASSURANCE:

This product is manufactured in the UK for Bunzl UK & Ireland and produced under ISO 9001 Quality Management System & ISO 14001 Environmental Management Systems. This product has not been tested on animals.

#### ENVIRONMENTAL:

All surfactants used in Cleanline products comply with the current European regulations concerning biodegradability & protection of the environment.

#### SAFE HANDLING:

Always wear the correct Personal Protective Equipment (PPE) when handling, dispensing or using chemicals. All PPE should comply with appropriate standards and be readily available for use.

In case of an accident please refer to the product Safety Data Sheet (SDS) for immediate first aid measures and helpline telephone number for a medical emergency.

#### SAFE STORAGE:

Store sealed in original container in a cool, well ventilated area away from direct sunlight and extremes of temperature.

## Biological Urinal Blocks

Cleanline® Eco Biological Urinal Blocks are a water soluble cleaning and deodorising block that maintains clean, odour-free urinal-traps and pipes.

- Helps maintain clean, odour-free urinal-traps and pipes and reduces the need for regular urinal flushing.
- Stays active in pipes preventing the build-up of solids that cause odours and blockages.
- Uses unique application-specific beneficial bacteria to remove uric-scale and solids.
- Suitable for all types of urinals and troughs including stainless steel, porcelain and ceramic.
- Leaves a fresh lemon fragrance.
- Does not contain carcinogenic pDCB.
- Ideal for use in waterless urinal systems.

**RECOMMENDED USE:** Use up to three biological urinal blocks per urinal.

**ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.**

#### INSTRUCTIONS FOR USE

Insert into toilet cistern or urinal as required, replace when depleted.

**PRO TIP: USE IN CONJUNCTION WITH CLEANLINE BIOLOGICAL WASHROOM CLEANER FOR A COMPLETE URINAL ODOUR CONTROL SOLUTION.**

#### CODE AND CASE SIZE:

**CL3036** - 1.1kg TUB

## FoodSafe Cleaner & Sanitiser

Cleanline® Eco Food Safe Sanitiser is a dual-purpose odourless cleaner ideal for use in food preparation areas for sanitising utensils, crockery, kitchen equipment and washable hard surfaces.

- Ready-to-use dual-action cleaner and sanitiser formula cuts through grease and dried on food soiling.
- Fragrance-free and non-tainting formula, suitable for use in kitchens and on food preparation surfaces.
- Effective against most common forms of bacteria including MRSA.
- Meets the requirements of EN1276 for complete bactericidal action with only 30 seconds contact time.
- Contains no phosphates or dyes.

**RECOMMENDED DILUTION:** Ready to use, no dilution required.

**ENSURE YOU ARE WEARING RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT (PPE) AND HAVE THE CORRECT EQUIPMENT FOR THIS TASK.**

### INSTRUCTIONS FOR USE:

#### Two stage cleaning for hard surface (best practice):

Stage 1 Clean: Remove all loose dirt/soiling and food debris from surface. Clean the surface/equipment and agitate any stubborn soiling with a scouring pad to remove all visible soiling.

Stage 2 Sanitise: Apply the solution to the surface/equipment and allow recommended contact time (30 seconds for protocol EN1276). Wipe with a clean cloth and rinse thoroughly with clean water. Allow to air dry.

**IMPORTANT: ALL FOOD CONTACT SURFACES SHOULD BE CLEANED REGULARLY AND WHEN CHANGING FROM RAW TO READY-TO EAT FOOD (OR VICE VERSA).**

### MICROBIOLOGICAL ACTIVITY

Tested independently in accordance with;

#### BS EN 1276:2019

Tested under dirty conditions, with a minimum contact time of 30 seconds.

Bacterial action against *Pseudomonas aeruginosa* ATCC 15442, *Enterococcus hirae* ATCC 10541, *Escherichia coli* ATCC 10536 and MRSA NCTC 12493

J000171-1

A summary of the tests is available on request.

**ZERO™**  
Washing Your Hands Of Plastic Waste

KIND TO  
THE PLANET

100%  
RECYCLABLE

OCEAN  
FRIENDLY

95% LESS  
CARBON

CLEAN HANDS | CLEAN PLANET | CLEAN CONSCIENCE

## Wash away plastic waste

Hand hygiene is non-negotiable. But should it come at any cost? Every year, millions of plastic soap refills are sent to landfill. Less than a third of our plastic waste gets recycled and a lorry load of it enters our oceans every single minute. We know this isn't sustainable, so we've created a smarter solution that safeguards hygiene without harming the planet – Zero™.

Zero is a revolutionary soap and sanitiser dispenser system using a 100% recyclable aluminium refill rather than the typical plastic bag refills. This pressurised system delivers the optimal amount of product every time with zero waste – and when it's empty, it can be recycled over and over again.

### Why Zero?

Most soap dispensers operate a standard 'box and bag' system – a plastic pump dispenser containing a bag of liquid soap. These systems can be wasteful and prone to leaking. Once empty, the refill bag has only a 30% chance of being successfully recycled.

Zero's pressurised, no-touch system provides metered dosing, delivering the right amount of product each time with no leaks and no waste left inside the refill. Once empty, the refill can be fully recycled with no loss of quality.

### Key features:

- One dispenser is compatible with all Zero products
- Easy product identification with supplied labels
- 100% recyclable refills
- Precise dosing for more shots per refill
- Compact and easy to store.

### Zero Dispensers

The Zero dispenser is manufactured from durable plastic, available in two finishes and features a no-touch infrared sensor for ultra-hygienic operation. It's easy to clean and new refills can be installed in seconds.

- Sleek, chrome effect dispenser
- No-touch infrared sensor
- 3xAA batteries last 12 months+
- LED indicators show when batteries and refills need replacing
- Adjustable booster setting for hygiene critical applications

### Zero isn't just clean, it's compliant too:

- REACH compliant formulations
- Dispenser complies with the WEEE Directive
- ECHA registered materials & components
- Dispenser & refill fully recyclable
- CE Marked

### Zero Luxury Foam Wash

A creamy cleansing foam loaded with skin-loving moisturisers for a luxurious hand washing experience that stops germs in their tracks.

- Kind to skin
- Makes hand washing a pleasure
- Cost effective
- 1500+ shots per can
- Zero waste

### Zero Moisturising Hand Sanitiser

A waterless, alcohol-based hand sanitising spray for instant hand hygiene that's more effective than soap and water.

- Instant hand hygiene
- Prevent infection and cross contamination
- Waterless – goes anywhere
- Effective germ kill
- Quick drying
- 2000+ shots per can

**“ Cherish the  
natural world  
BECAUSE  
YOU’RE  
PART OF IT  
AND YOU  
DEPEND  
ON IT ”**  
- Sir David Attenborough

## Our Zero waste pledge

75% of aluminium ever made is still in use today. It can be melted down and reused over and over without any loss of quality.

Aluminium is widely recycled across the UK and Europe and can be disposed of with your ordinary recyclable waste. Recycling your Zero refills should be completely hassle-free – but if you are unsure how to dispose of them, then we will be happy to take care of this for you.

The cans can either be recycled using your normal method of recycling or once a quantity have been collected, Zero can organise a collection. For more information, get in touch.

**ZERO™**

## NORTHWOOD

RECYCLING

Northwood collects

**100,000 TONNES**

of recovered fibres per year, predominantly sorted office waste.

**WASHING MACHINES**  
of space saved from landfill

## Recycling & Paper Mills

ALL NHP PAPER MILLS  
PRODUCE FSC® CERTIFIED  
BASE SHEET PAPER

Choosing Northwood recycled toilet rolls helps to reduce demand of forests by the equivalent of

**3300 FOOTBALL PITCHES**  
worth of forests every year

## NORTHWOOD

TISSUE

Multi million pound continuous investment in machinery and plant capabilities improves efficiencies and environmental impact.

River water taken for tissue production is put back downstream cleaner than when it entered.

The by-product from recycling is converted into soil conditioner for farming or animal bedding.

## Recycling & Paper Mills

Northwood produces nearly

**70,000**  
recycled parent reels a year

## NORTHWOOD

### HYGIENE

Production offcuts and rejects are sent back to mills to be made into parent reels

Significant continuous investment in state-of-the-art machinery and infrastructure

## Converting Plants

We manufacture over **100 MILLION** toilet rolls per year

Northwood Hygiene supplies pure pulp and recycled FSC® certified products

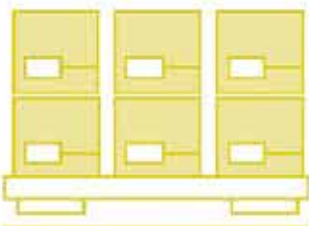

**OVER 75%** of our total sales volume is recycled paper.

## NORTHWOOD

### LOGISTICS

We distribute over **15 MILLION CASES** of product per year

Enhanced driver training programme has reduced fuel usage by **OVER 10%**

**NATIONAL DISTRIBUTION** to mills, converting sites and customers optimises efficiencies through return loads.

Significant investment in a state-of-the-art fleet that is **Euro 6 Compliant** and meets London's Low Emission zone requirement.

## FSC® Certification

Northwood proudly holds FSC® certification for its pure pulp and recycled products. To see which products are certified, take a look at our product brochures.

### What is FSC?

FSC is a globally recognised certification system allowing businesses and end users to identify products made with materials from well-managed and responsible forests and/or recycled sources.

**FSC helps to take care of forests and the people and wildlife who call them home and is recognised by WWF as the 'hallmark of responsible forest management'.**

Forest Stewardship Council®

By buying these paper products you help take care of the world's forests

FSC® C157444

### Why is FSC certification important to you?

- FSC has higher forestry standards and requirements compared with other certificate schemes. It delivers the highest level of for our endangered species and natural forests.
- FSC is a globally recognised scheme, that credible respected by business and end users.
- FSC operates in over 100 markets, with consistent standards and requirements across all of these.

## Why Use Recycled Paper?

Northwood has a large variety of recycled products, across all brands and categories.

### Demonstrates a commitment to the environment

- Less energy and water consumption versus pure pulp
- For a ton of reclaimed paper, 3.3 cubic yards is saved from landfill
- Helps customer CSER
- FSC® certified

### Quality product

### Breadth of offer

### Fast breakdown in water

## Recyclability & Plastics

Northwood products demonstrate a commitment to the environment in a number of ways, not just by offering recycled paper.

### Plastic

Hand Towel Wraps  
Case Wrap  
Conventional Toilet Roll Wrap  
Pallet Wrap  
Toilet Roll Inserts

Can be recycled using most existing recycling routes both domestically and commercially.

### Cardboard & Paper

Roll Cores  
Carbons  
Toilet Roll Wrap

Can be widely recycled both domestically and commercially.

### Wood

Pallets

Can be widely recycled or reused commercially.

## Northwood & The Environment Summary:

75% of our products are made from recycled paper

Northwood is fully integrated with a low carbon footprint

Northwood is a UK manufacturer, offering many advantages over so called 'green' products usually sourced from the Far East

# FRUITFUL OFFICE

Fruitful Office is the UK's #1 office fruit delivery company.

There has never been a more important time to promote health and wellbeing for your staff at the office, or while working from home.

**Over 99% of their fruit baskets are biodegradable or recyclable, and they are working on the remaining 1%:**

- Wicker basket – re-used for next delivery
- Transparent wrapping – biodegradable (made from corn starch) and protects fruit
- Basket tag – recycled paper
- Paper lining – recycled paper

**Eco-friendly rotation of baskets:** On each delivery day they deliver FULL baskets and collect the EMPTY baskets to re-use them. This avoids packaging waste with each delivery

**Eco-Route Delivery (ERD) system:** they operate an eco-friendly delivery route system that focuses on minimising the duplication of van routes

**Corporate Social Responsibility (CSR)**

They are proud to run a fruit tree-planting campaign: **for every fruit basket they sell - they plant 1 fruit tree**. This helps to mitigate the effects of global warming, deforestation and provides an income support to local communities in Malawi, Africa. Every 3 months they send their clients an update of how many trees their team have planted.

Many clients consider this a welcome addition to their CSR strategy.

**Supporting their local Community**

Their forward purchasing and strict quality check processes result in a certain amount of excess fruit each week which they, in turn, repackage and provide to various local and charitable groups such as Battersea Zoo, Bristol Zoo and less privileged nursery and primary schools.

London: St Mary's pre-school, St Ann's Nursery, Battersea Zoo; Southwest: St Paul's Nursery, Bristol Food Bank, Bristol Zoo; Midlands: Sifa Fireside charity; North: Lalley Centre; Scotland: Acredyke Nursery, Glasgow City Mission.

**Fruit Sourcing**

- They source approximately 60% of their fruit from the UK and Western Europe to support local farmers and minimize fuel emissions from long-haul transportation. Please remember that certain fruits such as bananas cannot grow in Europe
- They never buy air-freighted produce

**Warehouse recycling and office policy**

When they buy their fresh fruit, it arrives packaged in cardboard boxes on pallets. they recycle all cardboard and plastic waste, meaning minimal waste to landfills

Minimising paper print-outs at Fruitful Office. This includes sending out their monthly invoices to their clients electronically in pdf. format. Waste separation at their Fruitful Office recycling station.

WE THINK THE ABOVE IS FANTASTIC AND IMPORTANT. WHICH IS WHY WE TAKE 3 BASKETS PER WEEK FROM THEM FOR OUR OFFICES!
