FOOTWEAR

Understanding Safety Footwear

A short guide to footwear and their standards to help you identify which shoe or boot is best for you.

EN ISO 20345:2011

The basic requirement to meet the above is that the safety footwear must have a toecap of at least 200J. There are also other optional letters which can follow EN ISO 20345:2011 which identify the footwear as having the following properties:

P	- Penetration resistance
C	- Conductive
A	- Anti-Static
I	- Electrically insulating
HI	- Insulating against heat
CI	- Insulating against cold
E	- Energy absorbing seat region
WR	- Whole footwear resistant to water penetration / absorption
M	- Metatarsal protection
AN	- Ankle protection
WRU	- Water resistant upper only
CR	- Cut resistant upper
HRO	- Outsole resistant to hot contact
FO	- Fuel oil resistant sole
Slip resistance rating – one of:	
SRA	- On ceramic surface with "soap"
SRB	- On steel with glycerol
SRC	- Both of the above

*Information adapted from HSE standards 2016. <http://www.hse.gov.uk/foi/internalops/oms/2009/03/om200903app6.pdf>

STANDARDS

“**Considerations**
when choosing
FOOT PROTECTION”

If The Shoe Fits ...

Make sure that when you buy safety footwear you select a shoe or boot that fits you well. Take into consideration if you are going to be wearing thicker socks, you may need a slightly larger size.

Does The Shoe Or Boot Suit The Job?

Make sure that when selecting your safety footwear, you select the best pair for the job, not just a shoe or boot that catches your eye. If your job requires you to work in wet conditions, ensure you select a waterproof boot etc. If you need any help with choosing your safety footwear, our dedicated sales team will be able to help and advise.

*Disclaimer: Please note these are guidelines to help you pick the right product for you. For more information check the HSE/Manufacturers website.

Rock Fall Safety Footwear

Alaska S3 Cold Temperature Boot

Specification: **EN ISO 20345;2011 S3 HI CI -40°C HRO SRC**

Product Code: **491099**

- Capacity: 28Ltr

Product Code: **459907**

Boot Laces

- Black boot laces to suit a variety of shoes & boots

Product Code: **451612**

GLOVES

Understanding Gloves

A short guide to help you choose the right glove for the right job.

Mechanical Hazard Symbol

The symbol opposite is the mechanical hazard symbol. This will be shown next to many of the gloves in this section. It will also be accompanied by four numbers underneath relating to how many cycles it took before it had a hazardous effect on the glove. All the gloves with this symbol meet the European Standard and therefore conform to EN388.

EN388: 2003

A. C. T. P.

Abrasive Resistance

The first number shows the level of resistance to abrasion. The level of abrasive resistance is rated on a scale of 1-4 (with 1 being a low level of abrasive resistance & 4 being a high level of abrasive resistance).

Tear Resistance

The third number shows the level of resistance to tears. The level of tear resistance is rated on a scale of 1-4 (with 1 being a low level of tear resistance & 4 being a high level of tear resistance).

Cut Resistance

The second number shows the level of resistance to blade cuts. The level of cut resistance is rated on a scale of 1-5 (with 1 being a low level of cut resistance & 5 being a high level of cut resistance).

Puncture Resistance

The fourth & final number shows the level of resistance to punctures. The level of puncture resistance is rated on a scale of 1-4 (with 1 being a low level of puncture resistance & 4 being a high level of puncture resistance).

Understanding Symbols

Protection Against Chemicals

These symbols conform to EN374 and shows that the glove offers some protection from chemicals and/or micro-organisms.

Food Handling

This symbol shows that the glove is safe for handling food.

0. 0. 0

Protection Against Cold

The symbol opposite conforms to EN511. When a glove is shown to have this symbol, it means it protects the hands against convective and contact cold. This symbol also comes with three numbers underneath relating to performance levels for the glove. The first number shows the performance level (from 0-4) for Convective cold protection. The second number (from 0 -4) shows the level for Contact Cold. The final number shows the rating between (0-1) for water proofing. The lower the rating the less protection it has for those areas.

RATINGS

“ Considerations when *choosing* HAND PROTECTION ”

Glove Coatings

An important part of the glove selection process is making sure that the coating of the glove is right for the job it will be helping you with. A nitrile coating will allow you to work with wet substances.

Does The Glove FIT?

Making sure that you select a glove that fits you well is very important. A bad fitting glove will have a negative impact on your dexterity and accuracy when carrying out intricate tasks. Gloves tend to range from a small 6 to an XXL 11. If you are unsure of your hand size, we can help by sending out sizing charts and allowing you to test your size with our reps help and samples.

General Handling Gloves

SHOWA 306

Water Resistant & Breathable Latex Grip Glove.

Sizes Available
Product Code

7-10
491988

All Weather Grip Glove

Breathable, water repellent, fully coated latex grip glove. Reduces perspiration when it's hot, yet offers warmth & dryness in wet conditions.

Characteristics

CLOTHING

Understanding Clothing

A short guide to help you choose the right clothes for the right job.

High Visibility Clothing

EN471 & EN ISO 20471

These standards are applicable when choosing high visibility clothing. These relate to the amount of reflective and high visibility material on the garment. They will also show the class that they relate to.

Class 1 - Lowest Level: Typically consist of lower body or partially fluorescent garments

Class 2 - Mid Level: Typically consists of short or no sleeve garments and some trousers

Class 3 - Highest Level: Typically consists of upper body & full sleeved garments

GO/RT 3279

This is the rail group standard minimum requirement for high visibility clothing that is worn by people on the lineside or near the line.

Workwear Clothing

EN343 - Rain Protection & Waterproof Properties

This conformity standard relates to waterproof properties and breathability to three classes:

Class 3:1 - Level 3 to water penetration; level 1 water vapour resistance (breathability)

Class 3:2 - Level 3 to water penetration; level 2 water vapour resistance (breathability)

Class 3:3 - Level 3 to water penetration; level 3 water vapour resistance (breathability)

Other Clothing Conformities

EN531 - Protection Against Heat & Flame

This conformity often has a letter after it which relates to the following:

A: Limited flame spread (Fabric conforms to EN533 Index 3)

C: (C1-C5) - Insulation against radiant heat

E: (E1-E3) - Insulation against molten cast iron

B: (B1-B5) - Insulation against convective heat

D: (D1-D3) - Insulation against molten aluminium

EN533 - Protection Against Limited Flame Spread

EN ISO 11612- Heat & Flame Protection

EN ISO 11611- EN ISO 11612- Heat & Flame Protection

EN510 - Entanglement Protection (moving parts)

EN1149-5 - Electrostatic Protection

EN467 - Liquid Chemical Protection

EN381 - Chainsaw Protection

Ladies Hi Vis Vests & Polos

High Visibility Vest & Polos

Bollé Safety Specs

Safety is crucial. Make sure your eyesight is protected and your vision is clear. Bollé specialise in making safety specs. They now have a range of smaller specs that suit narrower faces. Pictured below and opposite is the Rush + Small specs available from Lee Brothers.

Rush + Small

The RUSH + small adopts an ultra-sporty design, is now available in size small, for narrower faces. RUSH + offers: upper protection, non-slip adjustable bridge, PLATINUM coating & co-injected ultra-flexible temples.

Bollé RUSH + Small

Conformities

The RUSH + conforms to the following standards:

- EN 166
- EN 170
- European standard - CE
- Mechanical risk, low energy impact - F
- Mechanical risk, high speed particles at extreme temperatures T
- Resistance to surface damage by fine particles - K
- Resistance to fogging - N
- Optical class - 1

Colours

The arms are now available in 2 colours:

- White & Blue
- White & Pink

Terms & Conditions

Account Terms - Nett Monthly

V.A.T. - Value Added Tax is not included in the price.

Prices - Prices charged will be those ruling at date of despatch. All goods subject to availability.

Carriage - The Company reserves the right to levy carriage charges for any order to be delivered in emergency circumstances.

Retention of Title - All products are at the risk of the Purchaser from the time they are delivered. Title to the goods shall remain with Bunzl UK Limited trading as Lee Brothers ("The Company") and only passes to the Purchaser when full payment for the goods has been received together with full payment of all other amounts owed by the buyer to The Company in respect of any other contracts for the sale of goods. Such payment shall become due immediately upon the commencement of any act or proceeding in which the buyer's solvency is involved. If payment is overdue in whole or in part The Company may (without prejudice to any of its other rights) recover or resell the goods or any of them and may enter upon the buyer's premises by its servants or agents for that purpose. Until The Company is paid in full all monies outstanding the relationship of the buyer to The Company shall be fiduciary in respect of the goods or other goods in which they are incorporated or used and if the same are sold by the buyer The Company shall have the right to trace the proceeds thereof.

Non-Delivery - Claims for non-delivery must be made in writing to The Company within 10 days of date of despatch shown on invoice.

Damage or Short Delivery - Damage/shortages must be noted on Carrier's Delivery Sheet immediately and notice in writing given to The Company within 3 days of receipt of goods.

Return of Goods - No goods (other than goods which reach the customers in an unusable condition) may be returned without the prior written consent of The Company. Where The Company consents to such return, the goods must be received from the customer in pristine condition, and the customer agrees to pay an administrative handling charge of 20% of the invoice value of the goods returned. It is our normal practice to replace any merchandise which might reach customers in an unusable condition. No handling charge will be made under these circumstances. It would help if goods which are being returned to us for examination prior to replacement are thoroughly cleaned and adequately packed before despatch.

Specification - The customer's attention is specifically drawn to the manufacturers' brochures and safety literature in respect of the correct use and application of products which The Company may supply. The customer shall be wholly responsible for checking that such products are entirely appropriate for the use and application to which they may be put. The specification and description of the goods in our catalogues have been supplied by manufacturers and were correct to the best of The Company's knowledge at the time of going to press. In view of the rights claimed by manufacturers to change specification without notice and whilst all reasonable care is taken to ensure that due notification of such change is given customers are advised to check the exact specification of all goods PRIOR TO ORDER where variations will be material to performance.

Liability (limits and exclusions) - Nothing in these terms and conditions of sale shall limit or exclude The Company's liability for: death or personal injury caused by its

negligence, or the negligence of its employees, agents or subcontractors (as applicable); fraud or fraudulent misrepresentation; breach of the terms implied by section 12 of the Sale of Goods Act 1979; defective products under the Consumer Protection Act 1987; or any matter in respect of which it would be unlawful for us to exclude or restrict liability. In all other cases, The Company shall under no circumstances whatever be liable to the Purchaser, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit, or any indirect or consequential loss arising under or in connection with the goods/ services sold; and The Company's total liability to the Purchaser in respect of all other losses arising under or in connection with the goods/ services sold, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstances exceed the price paid (or payable) for the goods in question giving rise to the potential claim.

Governing Law and Jurisdiction - In placing any order the Purchaser confirms it accepts these terms and conditions in full. Any dispute or claim arising out of or in connection with these terms and conditions (including non-contractual disputes or claims) shall be governed by, and construed in accordance with, English law, and the parties irrevocably submit to the exclusive jurisdiction of the courts of England and Wales.
