

STYLE REF: **3FW001L**  
STYLE NAME: **3FEET WORK - LOW**

**Rock Fall**®  
INDUSTRY DEFINING SAFETY FOOTWEAR

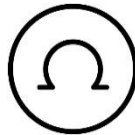

SPECIFICATION: SUITABLE FOR REQUIREMENTS: ANTI-STATIC, ESD, EH | SIZE UK 2-13 (WHOLE SIZES)

ACTIV-STEP® 3FEET WORK FOOTBEDS ARE DESIGNED TO SUPPORT COMMON FOOT CONDITIONS WHICH INCLUDE: PLANTAR FASCIITIS, FATIGUE, ACHILLES TENDONITIS, PRONATION/SUPINATION INSTABILITIES AND BACK AND KNEE PAIN.

THEY HAVE BEEN SPECIFICALLY DESIGNED FOR INDUSTRIAL WORKPLACES AND INCLUDE ANTI-STATIC STITCHING AND TAPE FOR PRODUCT ASSURANCES PURPOSES.

THE FOOTBEDS ARE MULTI LAYERED AND BUILT UP TO OFFERED TAILORED ARCH SUPPORT BASED ON THE WEARERS FOOT TYPE.

3FW001L

#### Anti-static

Anti-static shoes have an electrical resistance between 0.1 and 1000 Mega Ohm (M), measured according to EN 20344: 2011 5 10. This value is a compromise between good protection from electrical shocks and sufficient dissipative capacity. These shoes may be worn in many different work environments.

#### ESD

ESD (Electrostatic Dissipative) shoes have an electrical resistance between 0.1 and 100 (M), measured according to BS EN 61340-4-3: 2002 (IEC 61340-4-3:2001). ESD shoes are thus guaranteed to have an extremely low electrical resistance under any conditions in order to prevent a strong, uncontrolled electrostatic charge.

#### EH

Non-conductive footwear often is classified with an "EH" rating. This safety standard is designed to provide a secondary source of protection when accidentally coming in contact with live electrical circuits to reduce the potential of electric shock.
